Table of Contents

Session 1 Early-Stage Design Criteria for Intact Stability

Session Organizers: W.S. Peters and N. Umeda

On Vulnerability Criteria for Parametric Roll and Surf-riding
by W. S. Peters, V. Belenky, C. C. Bassler and K. Spyrou 1

Considerations on Parametric Poll and Dead Ship Conditions for the Development of Second Generation Intact Stability Criteria *by G. Bulian and A. Francescutto* 7

Validation Attempts on Draft New Generation Intact Stability Criteria
by N. Umeda, S. Izawa, H. Sano, H. Kubo, K. Yamane and A. Matsuda 19

On the Consideration of Lateral Accelerations in Ship Design Rules
by V. Shigunov, H. Rathje, O. El Moctar and B. Altmayer 27

Session 2 Regulatory and Compliance Issues on Damage Stability

Session organizers: H. Bruhns and J. Person

GOALDS – Goal Based Damaged Stability: Collision and Grounding Damages
by A. Papanikolaou, G. Bulian and C. Mains 37

Considerations on the Survivability Assessment of Damaged Ships
by D. Spanos and A. Papanikolaou 45

IMO Developments on RoPax Safety by *A. Scott* 53

Impact of Watertight Door Regulations on Ship Survivability *by J. Person* 57

Session 3 Operational and Special Issues

Session organizers: J. O. de Kat and L. Peres Rojas

Onboard Sea State Estimation Based on Measured Ship Motions
by U. D. Nielsen and D. C. Stredulinsky 61

Onboard Analysis of Ship Stability Based on Time-Varying Autoregressive Modeling Procedure *by D. Terada and A. Matsuda* 69

Statistical Data Set Comparison for Continuous, Dependent Data *by T. C. Smith* 75

Addressing Challenges in the Validation of Dynamic Stability Simulation Tools
by W. Belknap, T. C. Smith, and B. Campbell 81

Session 4 Experimental Techniques and Numerical Simulation in Ship Stability Assessment

Session organizers: F. van Walree and M. Dipper

Regular Wave Testing as a Crucial First Step for Dynamic Stability Evaluation
by D. D. Hayden, R. C. Bishop, and M. J. Dipper 91

Experimental Ship Dynamic Stability Assessment Using Wave Groups
by C. C. Bassler, M. J. Dipper, Jr. and M. Melendez 103

Deterministic Validation of a Time Domain Panel Code for Parametric Roll
by F. van Walree and P. de Jong 113

On Uncertainty in Numerical Analysis of Parametric Roll
by Y. Kim, D. M. Park, T. Kim and K. H. Song 121

Numerical Flow Analysis (NFA) Predictions of the Stability of the Joint High Speed Sealift (JHSS) Monohull in Head Seas *by K. A. Brucker, T. T. O'Shea, D. C. Wyatt, D. G. Dommermuth, W. R. Story, A. M. Powers and T. C. Fu* 127

CFD, System-Based, and EFD Preliminary Investigation of ONR Tumblehome Instability and Capsize with Evaluation of the Mathematical Model
by H. Sadat-Hosseni, M Araki, N. Umeda, M. Sano, D. J. Yeo, Y. Toda, P. M. Carrica, F. Stern 135

Session 5 Application of Stochastic Dynamics to Ship Stability

Session organizers: V. Belenky and A. Troesch

Estimating Dynamic Stability Event Probabilities from Simulation and Wave Modeling Methods *by M. R. Leadbetter, I. Rychlik and K. Stambaugh* 147

Stochastic Wave Inputs for Extreme Roll in Near Head Seas
by D. H. Kim and A. W. Troesch 155

Split-Time Method for Surf-Riding and Broaching-To
by V. Belenky, K. Spyrou and K.M. Weems 163

Extension of Statistical Extrapolation Techniques for a Strongly Non-linear System Using the Split-Time Method *by B. Campbell* 169

Modeling of Incident Waves near the Ship's Hull (Application of Autoregressive Approach in Problems of Simulation of Rough Seas)
by A. B. Degtyarev and A.M. Reed 175

Gaussian and Non Gaussian Response of Ship Rolling in Random Beam Waves
by Z. Su and Jeffrey M. Falzarano 189

Session 6 Parametric Roll

Session organizers: M. Neves and A. Francescutto

26th ITTC Parametric Roll Benchmark Study *by A. M. Reed* 195

On the Distribution of Parametric Roll by *V. Belenky and K. M. Weems* 205

Prediction of Parametric Rolling in Irregular Head Waves
by H. Hashimoto, N. Umeda and Y. Sogawa 213

Large Amplitude Roll Motion Forecasting through an Artificial Neural Network System
by M. Míguez González, F. López Peña, V. Díaz Casás and M. A. S. Neves 219

Quantitative Analysis of Parametric Roll and Operational Guidance
by K. H. Song and Y. Kim 225

Parameter Study of Numerical Simulation of Parametric Rolling of Ships
by M. Schreuder 233

Investigation of Susceptibility of Parametric Roll in Regular and Irregular Waves
by S. Y. Hong, B. W. Nam, H.-C. Yu and S. Kim 241

Uncertainty Analysis for Parametric Roll Using Non-intrusive Polynomial Chaos
by W. Wu, G. Bulian and L. McCue 249

Session 7 Stability of Damaged Ships – Numerical Simulation of Progressive Flooding and Capsize

Session organizers: A. Papanikaou and A. Peters

Numerical Study of Damaged Ship Motion in Waves
by Z. Gao, Q. Gao and D. Vassalos 257

Ship Motions Caused by Time-Varying Extra Mass on Board by
T. L. Manderbacka, J. E. Matusiak and P. T. Ruponen 263

Studies on an Assessment of Safety with regard to the Damage Stability of Passenger Ships *by Y. Ogawa and K. Ohashi* 271

Numerical Study of the Roll Decay of Intact and Damaged Ships
by Q. Gao and D. Vassalos 277

Session 8 Basic Theory & Roll Damping – Intact and Damaged Ships

Session organizers: K. Spyrou and A. Reed

Some Results from a New Time-Domain Bilge Keel Force Model *by D. S. Greeley* 283

Considerations for Bilge Keel Force Models in Potential Flow Simulations of Ship Maneuvering in Waves *by C. C. Bassler, R. Miller, A. M. Reed and A. Brown* 291

A Study on Estimation Method of Bilge-keel component of Roll Damping for Time Domain Simulation *by T. Katayama, Y. Yoshioka, T. Kakinoki and S. Miyamoto* 309

Approximation of Roll Damping by a Second Order Oscillator for Experiments at Different Scales and Numerical Calculations *by M. T. Hua, E. Régnier, M. Mélice and J.-F. Leguen* 317

Comparison of Some Analysis Methods for Ship Roll Decay Data *by E. M. Lewandowski* 325

Modelling of Hull Lift and Cross Flow Drag Forces in Large Waves in a Computationally Efficient Dynamic Stability Prediction Tool *by M. J. Hughes, P. J. Kopp and R. W Miller* 331

Computing Hydrodynamic Forces and Moments on a Vessel without Bernoulli's Equation *by A. M. Reed and J. G. Telste* 341

Viscosity in Ship's Dynamics *by M. Pawlowski* 353

Session 9 Integration of Stability Issues into Overall Risk Assessment

Session organizers: D. Vassalos and P. Alman

Thoughts on Integrating Stability into Risk Based Methods for Naval Ship Design *by P. R. Alman* 359

Incorporating Risk into Naval Ship Weight and Stability Control *by D. Tellet* 369

Session 10 Design for Survivability after Damage

Session organizers: A. Jasionowski and T. Katayama

A Method for Assessment of the Survival Time of a Ship after Collision *by M. Schreuder* 375

A Performance-Based Survivability Assessment of Regulatory Frameworks *by N. Tsakalakis, R. Puisa, K. Mohamed, D. Vassalos and C. Tuzcu* 391

Integration of Damage Stability into a Risk Management Framework *by W. Cai, D. Konovessis and D. Vassalos* 399

Survivability of Passenger Vessels – Re-engineering of the S-Factor *by J. Cichowicz, N. Tsakalakis, D. Vassalos and A. Jasionowski* 405

Defining Rational Damage Stability Requirements *by N. Tsakalakis, D. Konovessis and D. Vassalos* 415
